PROFESSIONAL SUMMARY

Consultant Senior Engineer with experience across backend, frontend, mobile application development, software architecture, performance engineering and AI-augmented developer workflows. Experience includes .NET, ASP.NET Core, Angular, .NET MAUI, Azure, SQL Server, DDD, CQRS, Clean Architecture, microservices and CI/CD.

EXPERIENCE

AgCode May 2026 — Present

Consultant Senior Engineer

- Developing AI-augmented engineering workflows alongside .NET/MAUI, backend/API and Angular work.
- Optimizing full-stack code paths and working on security fixes and application performance.
- Currently improving API performance with a target of reducing normal-case execution time by 10%.

Arcadea Group / Arcadea LLC May 2024 — May 2026

Consultant Senior Software Engineer

- Joined as a .NET full-stack developer and led the Android/.NET MAUI team during the initial product development phase.
- Designed a custom layout and abstraction layer with drawers, panes and hostable pages to bridge complex product mockups with available .NET MAUI components.
- Developed the mobile UI foundation over approximately 1.5 years and handed it over to the wider team.
- Moved into .NET backend and legacy Angular maintenance, addressing dynamic page-generation performance and coding standards.
- Built an AI-augmented SonarQube remediation workflow using shell scripting, Claude, isolated worktrees, test generation, TDD and automated code review.
- The workflow eliminated approximately five developers spending one day per week on recurring SonarQube issue fixing.

Nagarro Mar 2022 — May 2024

Senior Software Engineer → Associate Staff Engineer

- Mentored engineers, provided architectural guidance and upheld coding standards.
- Owned deliverables, estimation, dependencies and client coordination while working on performance and scalability.
- Developed backend functionality for a document-based Gen AI chatbot, including user, file and knowledgebase management.
- Designed RESTful APIs for care-home bed management and contributed to medications management modernization.

Zone24x7 (Pvt) Ltd Jul 2019 — Mar 2022

Software Engineer → Senior Software Engineer

- Designed and developed ASP.NET Core microservices using DDD and CQRS.
- Implemented Just-in-Time and Federated User Provisioning for IdentityServer4.
- Worked with Angular 8/9, NgRx, EF Core, SQL Server, SSIS/SSDT and T-SQL.
- Developed CI pipelines for custom NuGet libraries and APIs and integrated SonarQube analysis.

- Worked on DHIS2 Android applications, Java Spring Boot APIs and AngularJS applications.

OPEN SOURCE

- Apache DRAT — PMC Member.
- Ngx-input-Regulate — author of an Angular library.

TECHNICAL SKILLS

Backend: .NET, ASP.NET Core, EF Core, REST/Web API, Java, Spring Boot	Frontend: Angular, AngularJS, NgRx, RxJS
Mobile: .NET MAUI, Android, DHIS2 Android	Architecture: DDD, CQRS, Clean Architecture, MVC, TDD, Microservices
Data: SQL Server, T-SQL, SSIS, SSDT, Azure Storage	DevOps/AI: Azure DevOps, Git, CI/CD, SonarQube, Claude

EDUCATION & CERTIFICATIONS

B.Sc. Hons in Management and Information Technology
University of Kelaniya, Faculty of Science · 2015–2019

Certifications: Microsoft Certified: Azure Fundamentals (2020) · MCSA: Web Applications (2019) · MCSD: App Builder (2019)
